

Enhance the mountain resort experience with heated Dragon Seats!

Dragon Seats allow you to create a unique environment anywhere on the resort:

- Increase comfortable outdoor seating capacity.
- Increase food and drink revenue (+30% at some resorts).
- Increase overall customer experience and satisfaction.
- Allow ski school students to stay outside and warm during instruction.

The streamlined, fiberglass benches are designed for comfort and quickly rise to a temperature of 90° F. Dragon Seats also feature slip resistant heated foot decks, which are great for warming helmets, hats, gloves, boots and other ski equipment. Benches can be provided in any length to accommodate any number of individuals. Dragon Seats are available in standard white or can be customized with just about any look and feel. The possibilities are endless. Used by skiers, spectators, judges or any other audience, Dragon Seats keep people warm and on the mountain under any condition, especially extreme conditions.

The heat source is clean burning natural gas or propane. Dragon Seats are compatible with NSAA standards. Dragon Seats also provide safety and comfort on game day in the NFL and college football, including the Super Bowl!
